DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20 and 23-25, drawn to a bus interface, classified in class 710, subclass 305.
 - II. Claims 21-22, drawn to processor circuit with the bus interface, classified in class 710, subclass 300.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because any processor circuit can have different bus interface architecture. The subcombination has separate utility such as connecting any peripheral devices other than the processor to the bus.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Leroy Maunu, the applicant's representative, on March 16, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2111

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
